Norwich, Monday, Sept. 13, 1915.

The Circulation of The Bulletin

The Bulletin has the largest circulation of any paper in Eastern Connecticut and from three to four times larger than that of any in Norwich. It is delivered to over 3,000 of the 4,053 houses in Norwich, and read by ninetythree per cent. of the people. In Windham it is denvered to over 900 houses, in Putnam and Danielson to over 1,100 and in all of these places it is considered the local daily.

Eastern Connecticut has fortynine towns, one hundred and sixty-five postoffice districts, and cixto rural free delivery routes. The Bulletin is sold in every town on all of the R. F. D. routes in Eastern Connecticut.

CARRANZA'S REPLY.

By his reply to the communication of the representatives of Pan-American governments, Carranza discloses that he has no intentions of participating in a conference with the representatives of the other factions who are contending for the control of Mexico and he displays every confidence in his ability to establish peace and reorganize the government under the plan which he has in mind, and by so doing taking proper care of the interests of foreigners as well as those the continuance of the deplorable conditions of the people in Mexico which

he was in a better position to put the governments of the other republics restored. His turning down of the proposition submitted by the seven envoys is only what was anticipated.

NEW LEGISLATION WILL HELP.

In the announcement made by Acting Secretary Sweet of the department of commerce it is pointed out that the war in Europe has advanced this country to a place second to but one among the maritime nations of the world, but nothing is plainer than the conclusion which he reaches that while this is the situation today it does not mean that it will be permanent.

The war has furnished the reason for the increase in the merchant marine of this country which experienced an increase of 390,798 gross tons during the year. There was trade to he handled which the countries at war were obliged to abandon and it has been taken up by ships under the American flag because of the greater safety which was assured. This country has been forced to do in the shipping line what it has depended upon to a large extent, the merchant marines of other countries to perform.

Even while the war has served to help the merchant marine of this country there has been legislation from within which is going to oper-ate in a different direction. There are advantages under the American flag at the present time, but there are assurances that they will be handi-capped by the legislation passed and under advocacy just as soon as the war ends. The seamen's bill shows what has been done to discourage the merchant marine at home, while the proposed government ownership of steamship lines for competition with private capital indicates that the American registry can only furnish temporary attractions for transoceanic shipping. If the United States is to hold second place it must look to its egislation.

EDUCATION NEEDED.

There is more truth than poetry in the conclusion reached by the founder and president of an industrial school n Mississippi for the training of young colored men and women, following the receipt of a sum of money for 'ts use | departs. from one who wanted thereby to atone for the part he took in the lynching of a hapless Negro, when he believes that it is the opinion of that man sause of lynching is the open school safety,

door-rigid training in the elements of

It is invariably true that condition which lead up to lynching and mob violence are the result of a lack of ducation. It may not be that all those who participate in such crimes which are a violation of all decency, to say nothing of law and order, are educated people though in many instances leadrs in their respective communities, but it is nevertheless a fact that the condition of the Negroes who are so unjustly treated is due to a large degree to the attitude which has been manifested towards them. They know no better because there has been no effort on the part of those who are so quick to lynch them, in many cases on the on the part of those who are so quies to lynch them, in many cases on the frailest of evidence, to teach them better. There is, therefore, less excuse for the lynchers and upholders of mob law than there is for the uneducated and downtrodden man of black whose color and lack of opportunity places him at once under suspicion even though he may be innocent.

Education is greatly needed and the sooner the people in the lynching states realize it and devote their efforts as realize it and devote their efforts as heartily to bringing it about as they do to murdering them without a fair trial, the quicker will a big problem be removed.

A POINTER FOR AUSTRIA.

Thus far Austria has not indicated what its action will be regarding the notification sent to it expressing the fact that this country no longer considers Ambassador Dumba acceptable and asking for his recall. That it came as a surprise in view of the circumstances which brought it about hardly be expected unless Austria has gotten the impression that this country doesn't know when it is imposed upon and that it is still influenced by the Bryan declaration to Dr. Dumba that all its protests were for the satisfying of the American mind and not to be taken seriously abroad. It is furnished something to think

about, however, by the expression from The Lisky, a Bohemian paper published in New York, when it says: "In the name of our many thousand readers we herein protest against the outrageous insult committed by Austro-Hungarian Ambassador Dr. K. T. Dumba, to the Slavonic people in America, saying that Slavonic workmen in steel industries are not educated. But what is more outrageous Dr. Dumba is trying to disturb peace between American citizens and intended American citizens of foreign birth against the welfare of their beloved adopted country. All of our readers of Bohemian and Slovak nationalities (many thousands of them) think it is about time to hand Am-bassador Dumba his passport because he has made himself unfit in this

That shows no disposition to overlook his flagrant acts and Austria will do the sensible thing if it recalls its representative at once and does its part in maintaining the friendly re-

MUST ASSUME THE RISK.

Strange as it may seem Germany continues to cry out against the danger which its submarines must experience in endeavoring to put into operation respect for the idea of giving warning to steamships which they propose to sink. It finds difficulty in reconciling the part which it should play under international law which it of the Mexican populace. That Car- participated in making and the polranza has the best organization and lcy which it has adopted by itself at the present time is in the best position to straighten out the tangled affairs of that republic is to a large degree substantiated by facts, and his control is materially strengthened by the capture of Torrent It is the sales of the destroying of the commerce of its enemy. It believes that the risk which is taken by the underwater boats is too great for it to be expected that they should lay themthe capture of Torreon. It is the use selves open to attack and destruc-

WILLOW FURNITURE.

consequently less apt to break when tightened by the water treatment.

The oil adds considerably to the life of the furniture as well as improving it in appearance. In fact, any kind of basket work will last longer for a coat of oil. Old rattan chairs can be made new again by turning them upside down and scrubbing the sagged seat with hot water until it is smooth, and stiff again, and when dry coating the sagged seat with hot water until it is smooth, and stiff again, and when dry coating them to remain unattached for sufficient distance, so that the cozy can be easily slipped over the teapot. Of course, a padding of asbestog must be slipped into the homemade cozy. Be sure to keep this fact in mind when selecting doilles, so that they will be sufficiently large. and stiff again, and when dry coating with the oil.

one of the best remedies for pemoving the unpleasant odor from a room is to put a lump of ammonia into a common jar and pour in a few drops of any perfume on hand. The ammonia will absorb the extract. Then pour in a half a teacup or less of boiling water. ing water.

HEALTH AND BEAUTY.

To allow a child to sit in wet boots and stockings is to court illness.

Cucumber cream is made from two ounces of almond oil, one-half ounce eah of spermaceti and white wax, and one ounce of cucumber juice. The latter is made by washing and cutting a cucumber and putting with it a teaspoonful of water. This is heated slowly and brought to the boiling point, simmering until the mass is pulpy. It is strained.

Sunburn is often extremely painful. In many cases, where a girl has been out in the sun practically all day the skin blisters and causes very real suffering. It is a wise girl who knows how to care for her own sunourn, for she will save herself a good bit of pain by declaring it at once. by doctoring it at once.

cut of its hole and yet it figures that it should be allowed to violate international law and the rights of humanity in the pursuit of its course. Germany doesn't like to take its medicine because it happens to be bitter, even though it is its own prescription.

EDITORIAL NOTES.

The man on the corner says: Too many people mistake a hair trigger disposition for artistic temperament.

Dr. Dumba probably realizes that strengthen them wonderfully.

Massaging a sluggish facial skin daily will aid in the elimination of blackheads. Examine your skin by the aid of hand mirror, in a strong light. Where do your blackheads light. Where do your blackheads congregate? On your nose? In the crease of the nose where—yes, it sometimes happens!—in the ears! The latter cannot be cured by massage, but you can get rid of a large percentage of the crop on nose and chin by daily frictioning with the flat of the fingers dipped in cold cream. Do this in the morning, but at night use the complexion brush, which itself.

acts as a stimulant. TRELLIS VEILING.

Trellis veiling is chic. It has a large open mesh, yet it will confine stray locks and give the trim appearance which wearers of veils like. It comes in several designs but the large square mesh, each square a half inch or over in width and height, is one of the best

FOR FLATIRONS.

Flatirons that have become rough from rust or starch should be rubbed with yellow beeswax. Have a cake of the wax tied in a piece of coarse cheesecloth. Heat the iron until it is very warm, but not hot; rub the iron briskly with beeswax, and then quickly rub with a clean, coarse cloth until the surface is perfectly smooth.

TO SERVE TEA.

An easy way of serving a cup of tea is to place the cup on a matching plate and to put a folded tea napkin, a spoon and a fork on the plate. Then pass whatever sandwiches or cakes you may desire to serve with tea. They can be accommodated on the plate and daintily and easily eaten.

If elaborate cakes or sandwiches are served with tea and no plate is provided it is difficult to manage them balanced on the saucer of the cup. If a separate plate is held under the cup

and saucer it is practically useless, for the saucer so nearly fills it that the margin at the edge is not wide enough to accommodate the cakes. Of course, when a simple wafer or easily eaten sandwich is to be passed with the tea the saucer of the tsacup is sufficiently commodious to accom-modate it.

DICTATES OF FASHION.

of neat proportion, cover with art denim the color of the room and dec-orate with scenic post cards. Use just enough cards to give a dado border at the top and bottom. If the complexion is colorless avoid wearing delicate grays, greens blues. To bring out the brilliancy of cut glass ammonia should be placed in the water in which it is to be rinsed. All glass should be dried immediately and not drained.

Embroideries will be lavishly used now that the flounced and full skirted dresses have come in again. There are extraordinarily pretty robes of embroidered net and lace, robes so nearly made that any ordin-ary seamstress could put them to-

There are extraordinarily pretty robes of embroidered net and lace, robes so nearly made that any ordinary seamstress could put them together successfully.

JAPANESE DESIGN

JAPANESE DESIGN

JAPANESE DESIGN

If you have a tea set decorated with a Japanese design, don't fail to get a traycloth on which realistic Japanese birds and trees are stamped. Embroider the design in loose darning stitches, combining black and blue materials. By securing a pattern which is tinted you will have less work to do and the result will be just as satisfactory.

Since tea coxies are very much in prominence, it would be advisable for your china teapot, being sure to have the birds and trees stamped upon the coxy. Should you be unable to secure a coxy on which the Japanese design is stamped you may find two dollies bearing the design desired. In this case you can easily make a coxy from the two doilies by joining them together. Allowing them to remain un-To renovate willow furniture, scrub with a brush, using salt instead of scap, and rinse thoroughly. Do the work out of doors if possible where plenty of water can be used, because all the salt water must be rinsed off. When quite dry go over each part with pure linseed oil. This will soften the willow, making it more pliable, consequently less apt to break when tightened by the water treatment.

The all adds considerably to the life. Meat Souffle—Meat souffle is a good leftover meat for warm weather. To make it, prepare a cupful of good white sauce, well seasoned, and to this add a cupful of chopped meat of any sort. When it is hot add the yolks of two eggs, cook for a minute and cool. Beat the whites stiff and add to the cool mixture, pour into a buttered

The dainty woman who pays care-ful attention to the accessories of her ful attention to the accessories of her toilet must reoice over the veil novelties. These are chic and fascinating in the extreme—of course, when worn by the right woman. In many cases these abbreviated affairs are shaped—a half circle is the most approved, while others are straight on the lower edge, with the design is circle. cular form the design coquettishly hiding the eyes, while the lower straight edge calls particular attention to milady's rosebud mouth. Another charming model of filet net is slightly gathered, part of the way, into a vel-vet band, which is fastened around the neck. Plain filet meshes are popu-lar, dotted with chenille along the edge. Lace embroidery is also exten-

sively worn. NEEDLEWORK NOTES.

A piece of lace or net starched and put under a hole in a lace curtain, when pressed smooth with a warm iron, will scarcely be visible.

but who will bless his efforts bear the name but which has been dubbed sport shirt Truly it takes a sport to wear one. Only the young dubbed sport shirt Truly it takes a sport to wear one. Only the young and unsophisticated should have the temerity to clad their persons in this garment of the seventeenth century. One naturally looks for its wearer to be bedecked with those other monstrosities, a parasol, monocle. mustache, spats, and wearing a silk handkerchief tucked up his sleeve. Stand back, ye Romansi. Dare ye not lay a finger on the men who drowned the sport shirt at Atlantic City. They have done a great thing for suffering humanity. If this sarment comes to the surface next year it should meet a similar fate.—New Britain Herald.

> THE WAR PRIMER By National Geographic Society

as shells and shrapnel. The material used in these army clothes is what we call shoddy. Woolen rags, used over again. These rags are purified, rewoven into cloth and form the staple of the blankets, uniforms and other woolen equipments of the armies of Europe, of every nationality engaged in the great war. The value of finished goods has increased greatly in England and in other belligerent countries and that fact adds another burden to the already heavy load that the war has imposed on the nations.—Bridgeport Telegram. Royno, at the southern end of the third Russian line of defense along which the Tsar's troops are now reported to be regrouping, is become of first importance, as being the last stronghold blocking the German advance into the rich hinterland of Lit-tle Russia, or the much contested Ukraine, and as lying across the Teu-tonic path south to the Black Sea. The following description of this strategic point of latest interest was issued today by the National Geo-

graphic society:

"Rovno is the fartherest removed of a triangle of fortresses guarding southern Russia. Lutzk, the apex of this triangle, lies north of the Galician city of Brody, and about \$5 miles northeast of Lemberg. Dubno, in the southeast, \$3 miles northeast of Brody and about \$5 miles northeast of Lemberg. Dubno, in the southeast, \$3 miles northeast of Brody, is a point on the Lemberg-Rovno railway. Rovno is situated in the midst of a hilly graphic society: difficulties of the task of raising an army commensurate with the country's probable need in an emergency. It has forcefully demonstrated the folly of the belief that a great army can be raised and trained within a short time. Every man who has learned this lesson at Plattsburg goes back into private life an ardent advocate of the principle of military preparedness. The Plattsburg idea has taken hold and is rapidly spreading.—Torrington Register. no is situated in the midst of a hilly no is situated in the midst of a hilly country, 40 miles east of Dubno, and the fortress is a junction point on the railway running from Koenigsberg through Osowiec, Brest Litovsk, and Kovel to Kherson and Odessa with that north and south line of railroad which Funs behind the third line of Russian defense, from Vilna through Lida, Baranovichi to the southern fortress.

Lida. Baranovichi to the southern fortresa.

"A German peasant community is settled in the rolling country to the north of the fortress. Here begins, also, the line of sunflower culture. The sunflower forms a much respected article of diet in Muscovy, and in season eaters of sunflower seeds are found everywhere. The peasants dry the seeds and chew them as means for reflection and for diversion, much as gum is chewed in America. When the peasant strikes up an acqueshtance with a stranger he offers him, by way of breaking the ice, a handful of seeds, as the people of the west offer a drink or cigar. Places of public use are often crisp underfoot with the husks of the seeds, which are consumed in great quantities, and particularly is this true of the railroad stations. "Rovno is a town in the government of Volhynia, distant 115 miles westnorthwest from the capital, Zhitomir, Besides, its military value it has no

importance. Its population of 25,000 handling to an innocent posterity this mostly Jewish, has some commerce in perfidious oracle of style that should grain, cattle and wood, and there are a few flour mills and distilleries. Rov-no is a strongly guarded gateway to a wealthier country just beyond."

The city of Siedlee, recently captured by the German army marching east from Warsaw against Brest Lit-ovak is described by the National Geo-graphic Society in today's sketch of the geography of Europe's battlefields. The war primer reads:

"Siedice; while of little or no in-dustrial or commercial importance, is an important railway junction, which binds the trunkline railways, War-saw-Petrograd and Warsaw-Moscow, by a north-and-south line, beginning at the fortress Ostrolenka and ending at Lublin. One of the lines from Siedlee runs south to Lukow, and then turns east through Meshirjetsche and Biala to Breet Litovsk. On the railway front, Stedice-Lukow, the German army which captured Warsaw was united to that before which ivangorod fell.

Lukow was taken by the Ivangorod troops about the same time that the city to the north was won.

"Siedice lies about 56 miles east-southeast of Warsaw, Lukow is twenty miles southwest of Siedlee, while Brest Litovsk is 55 miles from Lukow and 60 miles from the northern city. Siedlee is about 31 miles south of the Warsaw-Petrograd Railroad, and from its junc-tion a main line branches northeast to the important city of Minsk, while another branch runs east, past Brest Litovsk to Gomel, a manufacturing town and an entreport for agricultural

town and an entreport for agricultural products.

"There is little more than the railway junction and the seat of the gov-ernment administration at Siedice. It plays a small part in assembling the agricultural products of the district, and the Oginskis have embellished the little town with a beautiful palace and well-planned gardens. The population is about 24,000, of which the Jewish element is more than two-thirds."

Chester.—Miss Katle Wilcox of Chester, who is going to Madura. India, under the American Board, will be commissioned at the fist annual meeting of the Foreign Missionary societies of Middlesex county connected with the New Haven branch of the Woman's Board of Missions which will be held at the Congregational church in Chester Sept. 15.
